and lower environmental impact

Identifying opportunities for higher plant productivity, and lower environmental impact

You know your plant equipment best, including how well it performs. SKF knows rotating equipment, and how to make it perform better. So, let's talk about your plant goals, and find some cost-effective ways to achieve them.

The Power of Knowledge Engineering

Drawing on five areas of competence and application-specific expertise amassed over more than 100 years, SKF brings innovative solutions to OEMs and production facilities in every major industry worldwide. These five competence areas include bearings and units, seals, lubrication systems, mechatronics (combining mechanics and electronics into intelligent systems), and a wide range of services, from 3-D computer modelling to advanced condition monitoring and reliability and asset management services. A global presence provides SKF customers uniform quality standards and worldwide product availability.
